

Commercial Recycled Water Fill Station – Application Instructions

1. Please complete only the top two sections (Applicant Information and Recycled Water Usage Information) of the application on the following page.
2. Read, sign, and date the acknowledgement at the bottom.
3. Submit your completed application via email to hydrant@centralsan.org.

What Happens Next?

Upon receiving your completed application, a Central Contra Costa Sanitary District (Central San) staff member will contact you to schedule a training class for your designated Recycled Water Site Supervisor.

The Recycled Water Site Supervisor is responsible for overseeing the use of Central San's recycled water by your company, and for ensuring that any employees using CCCSD's recycled water are trained on its proper use. Ideally, the Recycled Water Site Supervisor is the person that will be picking up and applying recycled water at the construction site.

There is no charge for recycled water used in calendar year 2017. In the future, Central San may resume charging for recycled water usage.

After the training class, Central San staff will issue a Recycled Water Use Permit that contains an account number that is needed to operate Central San's Commercial Recycled Water Fill Station. This automated station dispenses recycled water via an overhead fill pipe, so only commercial water trucks are eligible to enroll in this Program.

Application for Commercial Recycled Water Fill Station Service

Section I. Applicant Information

Company Name: _____ Contractor's License #: _____

Company's Designated Recycled Water Site Supervisor: _____

Company Address: _____

Office Phone: _____ Site Supervisor's Cell Phone: _____
