

PLEASE

Don't Flush "Flushable" or "Disposable" Products!

Many personal hygiene wipes and cleaning products are marketed as being "flushable."

But despite the confusing and misleading labels, you should **never flush** "flushable" or "disposable" products.

No matter what a label says, the only items you should flush are human waste and toilet paper.

Just because something disappears down your toilet doesn't mean it won't cause a problem in your sewer pipe -- or further down the line at wastewater treatment facilities. Items labeled as "flushable" or "disposable" (even "biodegradable" ones) can get caught on roots or debris in sewer pipes and contribute to blockages and overflows.

**Dispose of them in the trash,
NOT THE TOILET!**

WIPES CLOG PIPES

Nasty clumps of so-called "flushable" or "disposable" wipes can clog sewer pipes and damage wastewater treatment equipment.

**Flush only human waste
and toilet paper**
