

YOU ARE INVITED TO JOIN THE PIPE PROTECTORS

Central San's Pipe Protectors program is designed especially for Kindergarten through 2nd grade students

Our instructors help students learn all about how dirty water (from washing our hands, flushing the toilet, or taking a shower) becomes clean water. Students will learn about wastewater's journey from their home back to our local environment, as well as Central San's role in this complex process.

The hour-long program features a multimedia presentation, an activity workbook, student giveaways, and more!

For more information or to sign-up your classroom, contact us at 925-979-5053 or edprograms@centralsan.org

The Pipe Protectors program is FREE to teachers within Central San's customer service area (as shown in the map at right).
